

ASP Management,

With an ever-changing environment and business landscape, now more than ever we need suppliers we can count on. Specializing in the automotive industry, I personally have worked with ASP through various different positions and companies beginning in 2010. During each transition, I have proactively chosen to continue working with ASP as my #1 supplier for all automotive products.

ASP delivers an online resource for its distributors, which has allowed me to work effectively and efficiently in the field. Quick access to product pricing, orders, tracking, invoicing and availability of product, which has been huge during a time of uncertainty with suppliers.

I've also got a seasoned rep who I can always count on to deliver; whatever the need, he has come through with an option, whether it be pricing, special program development or warehousing, he has always had our options out in front of us. With a fast-paced environment, this is exactly what we need.

It's an easy decision to work with ASP, I will continue to work with them as I move forward in my business.

Best,
